

## InterDialog CCS AOD Automatic outbound Dialer

For years, businesses have depended on call services and specially designed systems to handle phone broadcasting, from political campaign, telemarketing lead generation, debt collection, to merchant order pickup and event notification. Unfortunately, these services and systems can cost thousands of Rupees, putting them out of budget for many businesses and organizations.

Teckinfo Autodialer is suitable for anyone who needs automated phone messaging solutions. From large corporations to small businesses to individual users, system does everything a traditional telephone equipment does, at a fraction of the cost. This incredibly easy-to-use, yet powerful software package completely eliminates the tedious and error prone human labor of repetitive phone calls. Teckinfo Autodialer works seamlessly on any PC. It's so simple; broadcast to a large group over the phone has never been easier.

### Advantages:

- Delivery real and measurable business values
- Let your computer make the auto calls
- Maximise productivity
- Comprehensive reporting
- Improve Planning
- Improve Return on Investment

### Features

Components are

- Call flow designer
- Server/Database Application
- Report Application (ACD monitor)

System has a message designer that lets you to personalize each phone call. It includes text-to-speech technology; you can enter text next to a phone number. The text is read over the phone just for that phone number. You can customize your messages any way you like by editing the message.

Easy to install and configure

- Entry Level Server / PC with 512 MB RAM
- MS SQL Server / MS Access
